Standard heights

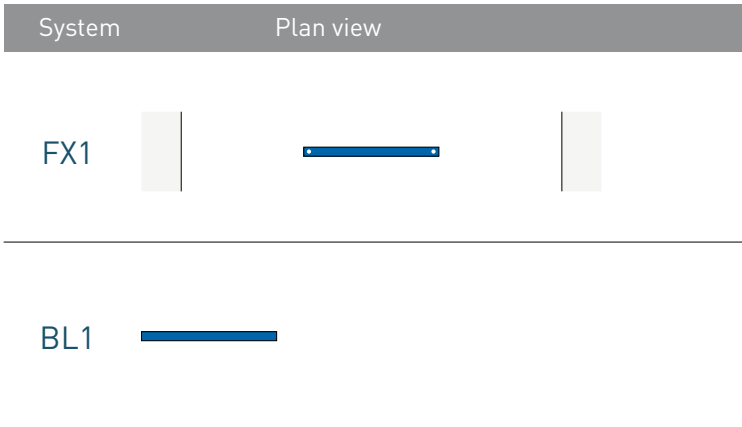

System	Opening Height *
FX	81-1/2", 93-1/2", 105-1/2", 117-1/2"

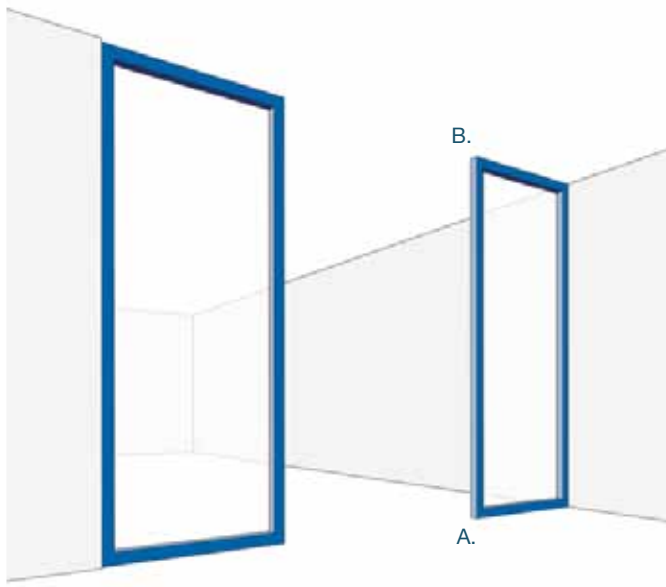

* Opening heights are from finished floor to top of leveled bracket.

Panel models:

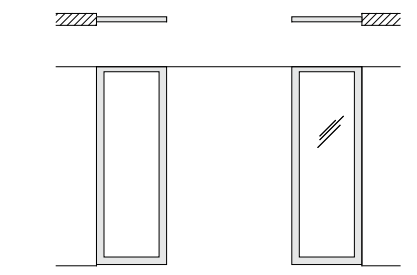

- 225, 175F (FX)
- 225, 175, 175F (BL)

Fixed panels are very versatile because they can be used in a series to create a wall, room or as screens for added privacy to a particular area. The panel sits on an aluminum "U" channel (surface mounted to the floor), and slots into an overhead angle bracket allowing the panel to stand free from the wall if desired. Each panel contains two blind levelers to help secure and level the door. Raydoor also sells panels containing no hardware called Blank (BL) panels.

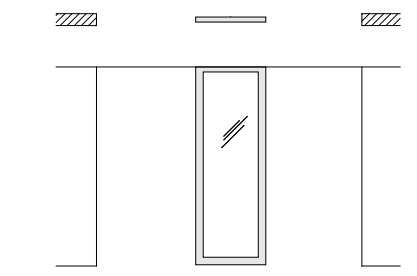

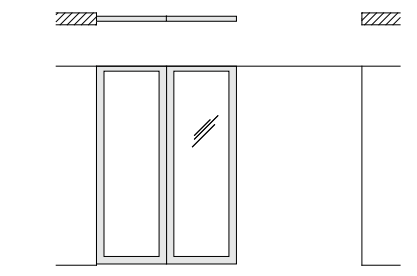

Operation Overview

Features

Blind Leveler
Sits in a floor mounted "U" channel and is used to raise the panel into place for a snug fit.

Ceiling bracket
Indexes into the top of the panel to align and hold the panel secure.

"U" Channel
Installed on the floor, the "U" channel catches the blind leveler; is used to stabilize the panel and align multiple panels when needed.
